**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.

***Specification***

1. The use of the trademark "Caterpillar" has been noted in this application. It should be capitalized wherever it appears and be accompanied by the generic terminology.

Although the use of trademarks is permissible in patent applications, the proprietary nature of the marks should be respected and every effort made to prevent their use in any manner which might adversely affect their validity as trademarks.

2. The disclosure is objected to because of the following informalities:

The spelling of words such as "tones" on page 3 must be corrected.

The word "transversal" appears to have been used incorrectly throughout the disclosure. It is believed that the word - -transverse- - is intended.

On pages 6 and 7, the word "pins" should be changed to - -lugs- - to correspond to the common terminology in the art.

On page 7 the word "dogs" should be changed to - -cogs- -.

Appropriate correction is required.

***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 3617

4. Claims 1-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1: It is not clear if the "at least one layer" on the inside and outside in line 5 includes the "outer layers" of lines 9 and 10.

In claim 2 it is not clear if it is the second, third, or fourth layer being claimed in the "additional transversal layer."

***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1, 2, 4, 5, and 7 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Yoe.

Note figure 2. At least the wires 26, 27 are spirally wound in the belt.

***Claim Rejections - 35 USC § 103***

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. Claims 6 and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yoe.

9. Yoe meets all of the limitations of claim 1 as set forth in paragraph 6 above but the dimensions of the wires are not specified.

The diameters of the wires are obvious as mechanical expedients because of those ordinary skill in the art could readily choose suitable diameters for the wires based on the size of the belt, the size and weight of the vehicle the belt is used on, the intended use of the vehicle, and many other factors.

10. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Yoe in view of Nishimura et al.

The belt of Yoe does not have an inner transverse layer at a right angle to the turns of the cable.

Nishimura et al teaches a track assembly comprising endless cables 3 and inner and outer transverse cables 4 and 5. From this teaching it would have been obvious to provide the belt of Yoe with an inner transverse layer of cables to improve the rigidity of the belt.

### ***Conclusion***

11. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The references show other track belt constructions.
